DETAILED ACTION

Claim Rejections - 35 USC § 112

1. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

2. Claims 44--52 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

In claim 44, line 2, the phrase "said signal" is vague. Which signal is this referring to?

In claim 45, line 3, the phrases "said attenuator" and "said injector" lacks antecedent basis. It appears that this claim should be depended on claim 44 to provide the proper antecedent basis.

In claim 47, line 3, the phrase "said injector" lacks antecedent basis.

In claim 48, line 3, the phrase "said displacement" lacks antecedent basis.

Double Patenting

3. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225

Art Unit: 2856

USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

4. Claims 7 and 43-52 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over either claims 1-11 of U.S. Patent No. 6,732,586 (Nozoe et al.) or claims 1-14 of U.S. Patent No. 6,244,095 (Nozoe et al.). Although the conflicting claims are not identical, they are not patentably distinct from each other because the claims presented in the references, '586 of Nozoe et al. and '095 of Nozoe et al., claim the features as presently claimed in the instant application. For example, the claims in the references claim a sensor element; a driver circuit; detection means; self diagnosis means; an attenuator; an injector. Furthermore, the specification of both of the references suggests and teaches the features and elements of the claimed invention.
